

**LOOPS
LOOPS**

SEEKING FOR THE

ULTIMATE

WAVEFRONT SENSOR

P. Janin-Potiron, O. Fauvarque, V. Chambouleyron,
C. Bond, CO Correia, B. Meichel, J.-F. Sauvage, K. El-
Hadi, K. Dohlen, E. Muslimov, T. Fusco

**Wavefront sensing in the VLT/ELT era
Florence, 28/10/2019**

THE GENESIS OF THE LOOPS TESTBED

I don't know ! But I think we might need a bench to solve the mystery !

THE GENESIS OF THE LOOPS TESTBED - THE GOALS

I. PROVIDE A WELL-CHARACTERIZED R&D BENCH

Strehl ratio

Wavefront error

Turbulence control

PROPOSE INNOVATIVE WAYS TO OPERATE THE PYRAMID

Gain tracking

Reconstructors

PROPOSE AND STUDY NEW MASKS

3PWFS

Flattened pyramid

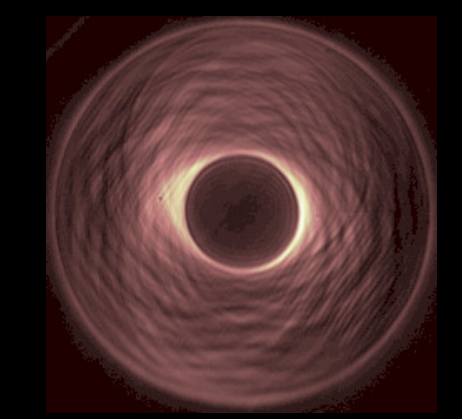

iquad

INGOT

Axicone

IMPROVE THE CAPABILITIES OF FOURIER-BASED WFS

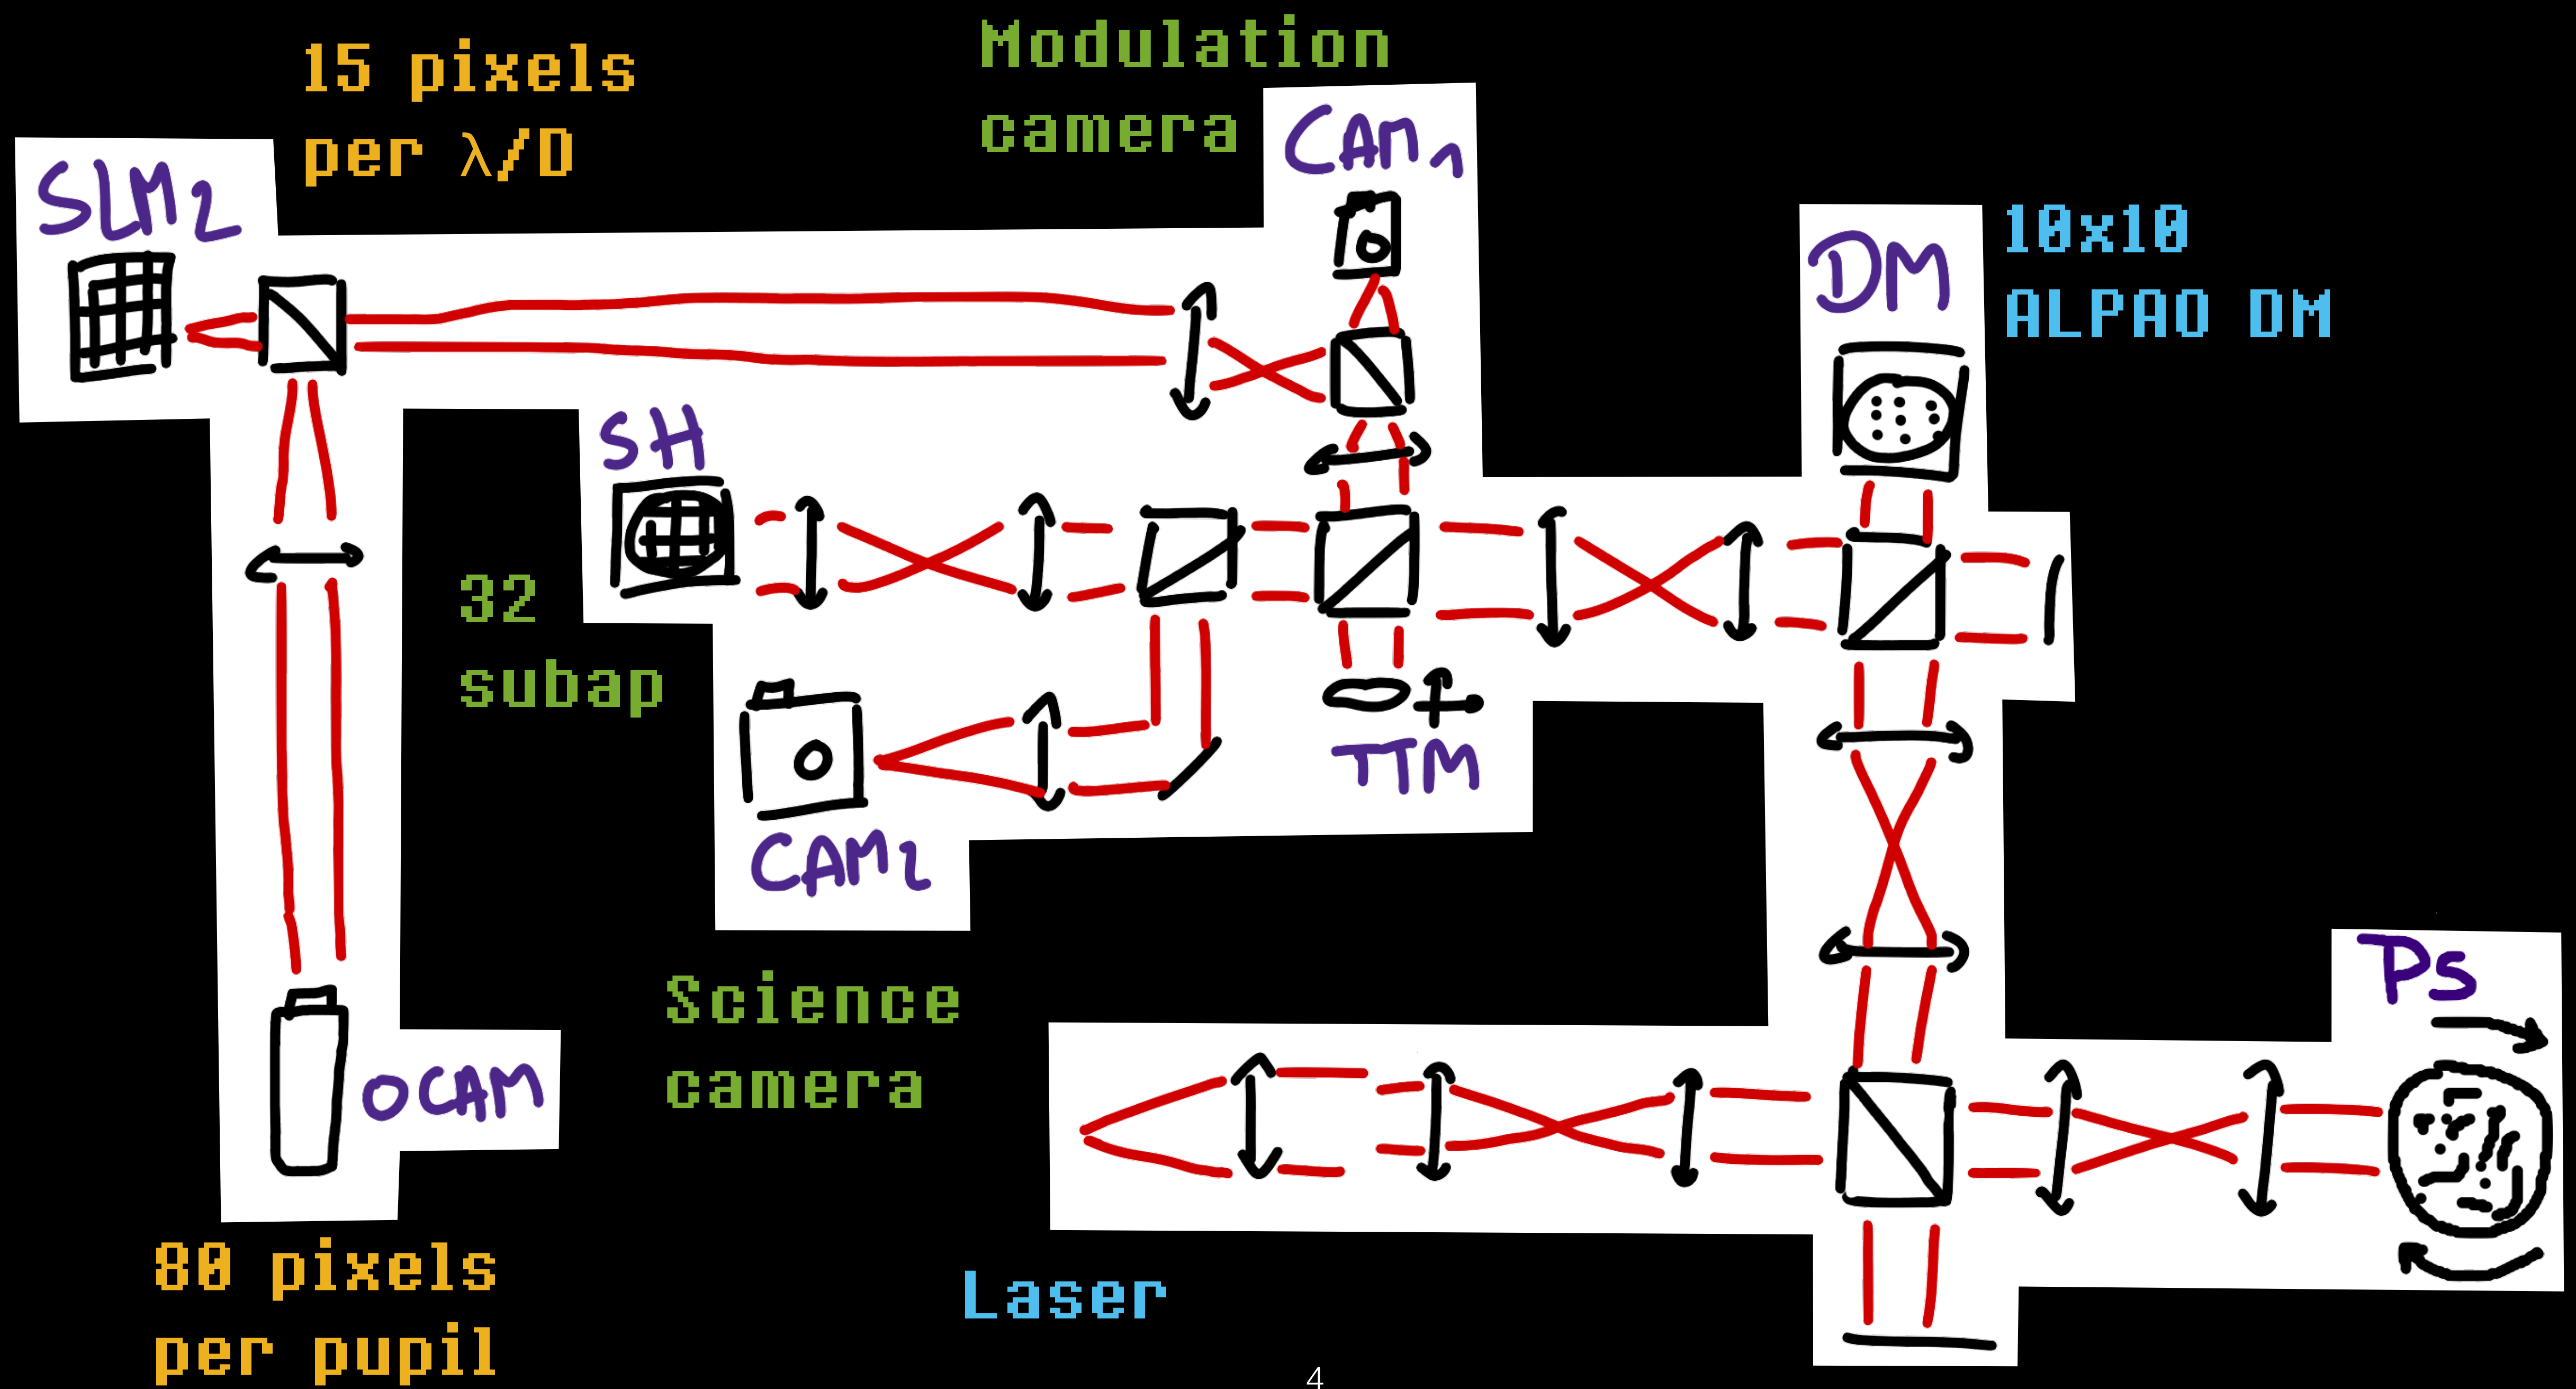

Higher dynamic

More sensitivity

More linearity

THE GENESIS OF THE LOOPS TESTBED - THE BENCH (1/2)

80 pixels per pupil

THE GENESIS OF THE LOOPS TESTBED - THE BENCH (2/2)

THE ALMIGHTY LOOPS !

Attack "SLM in da face" !

THE ALMIGHTY LOOPS ! - DEMONSTRATION OF THE BENCH

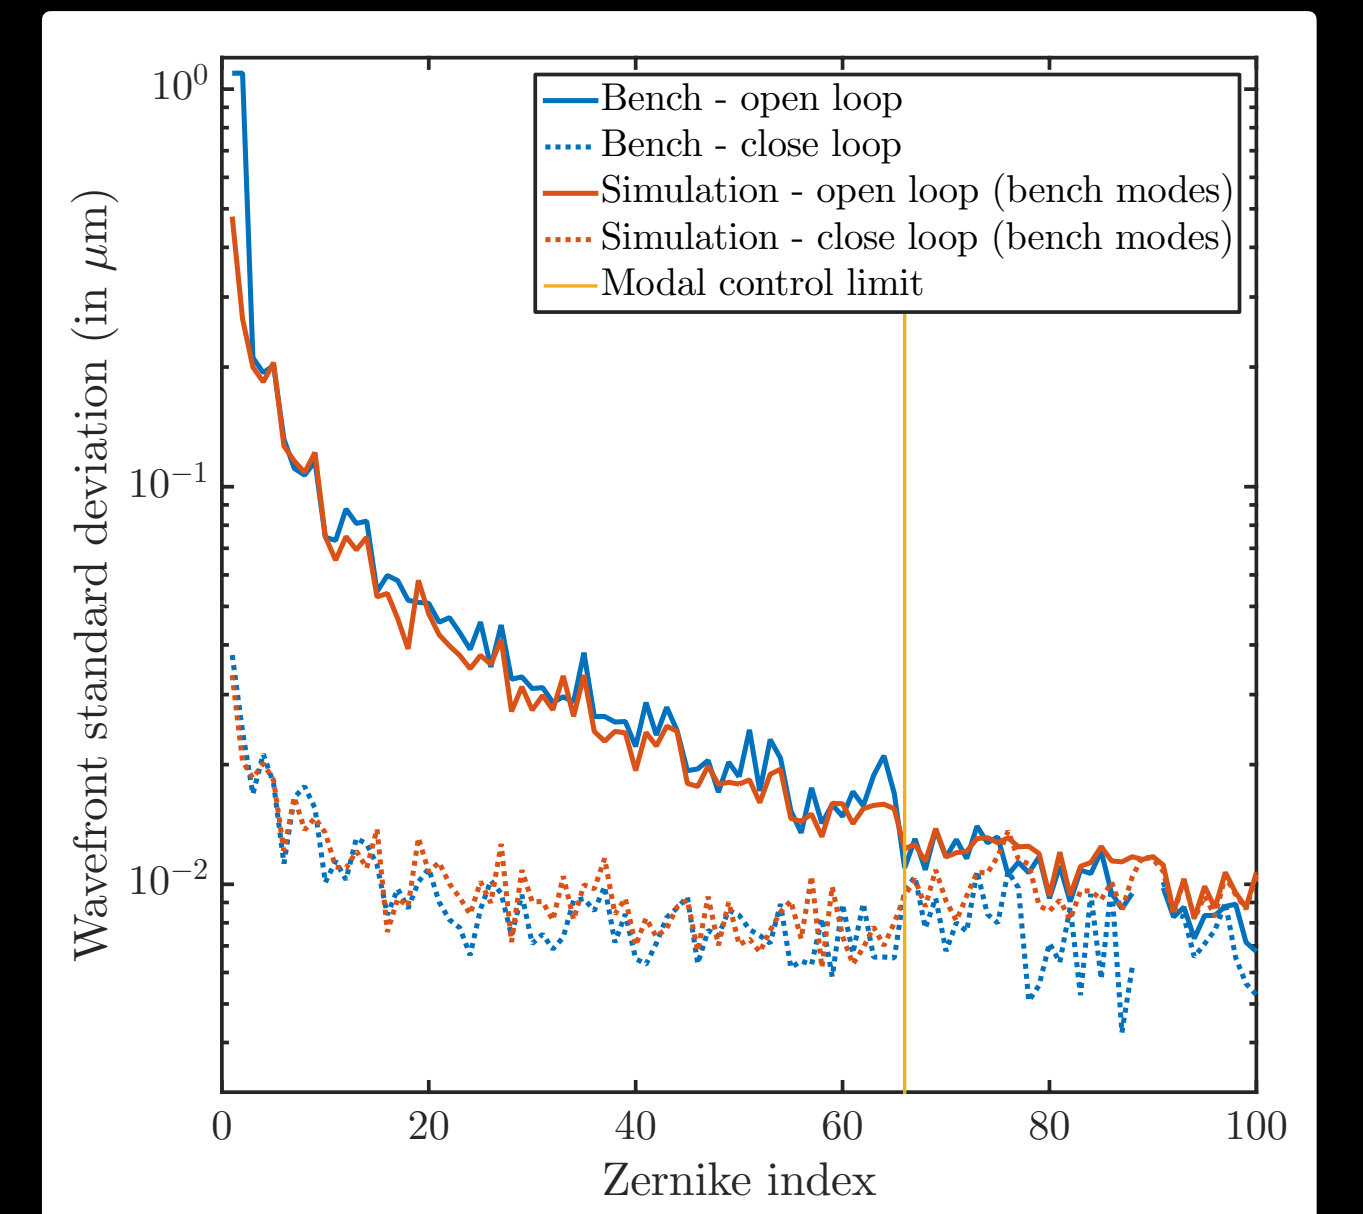

Produce any kind of Fourier-based WFS

Calibrate

Study a known system

THE ALMIGHTY LOOPS ! - DEMONSTRATION OF THE BENCH

And finally have fun !

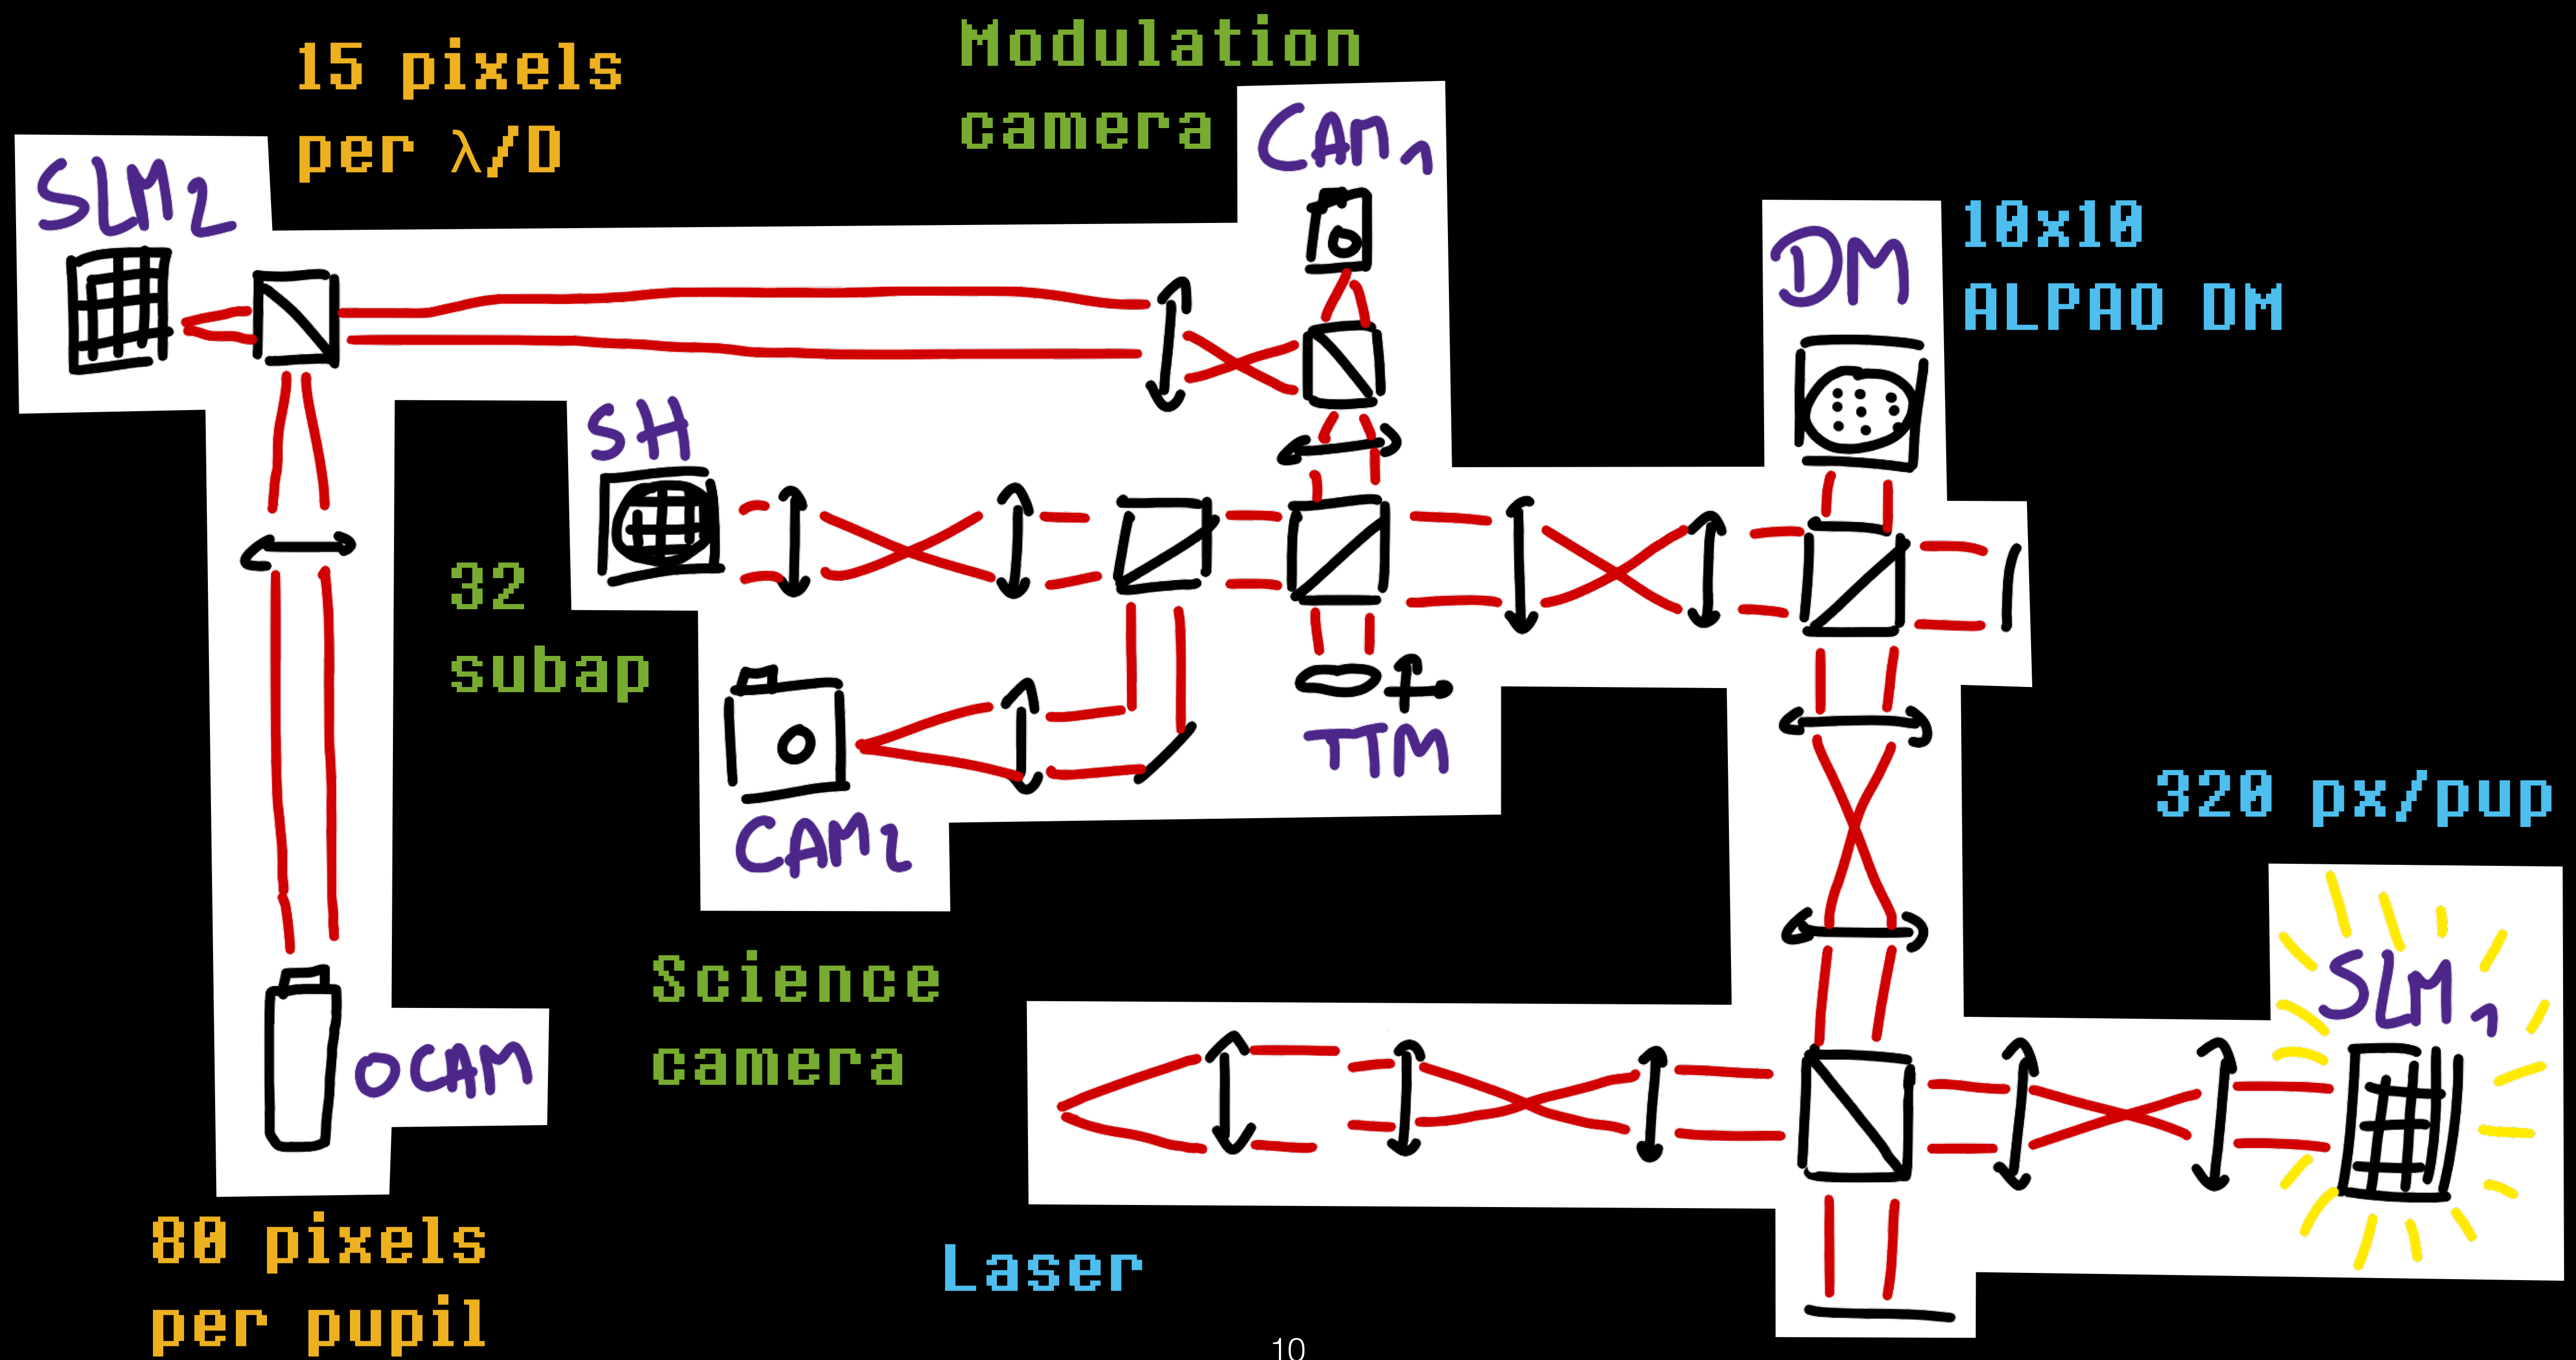

THE LOOPS EVOLUTION

What?! LOOPS is evolving?

THE LOOPS EVOLUTION - THE BENCH v2.0

THE DYNAMIC

HOW FAR CAN IT REACH?

DOES IT SHOW A SATURATION REGIME ?

THE LINEARITY

HOW CLOSE TO A LINEAR BEHAVIOR IT IS?

HOW DOES IT PERFORMS USING A LINEAR RECONSTRUCTOR ?

THE SENSITIVITY

HOW ACCURATE WILL THE MEASUREMENT BE?

HOW DOES THE SENSOR PERFORMS AT LOW FLUX?

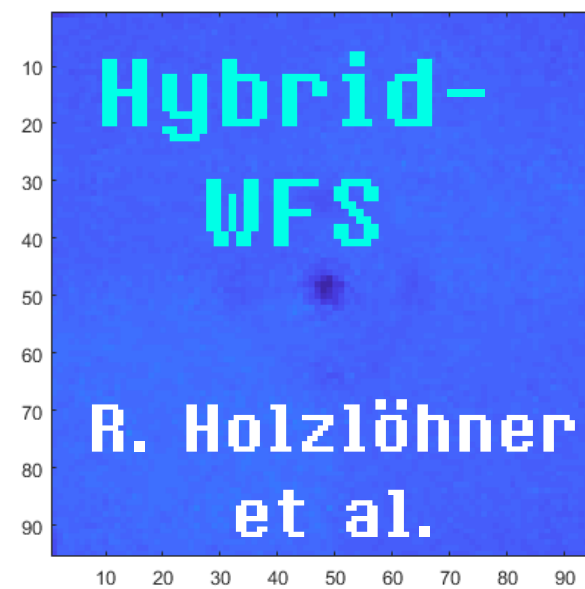

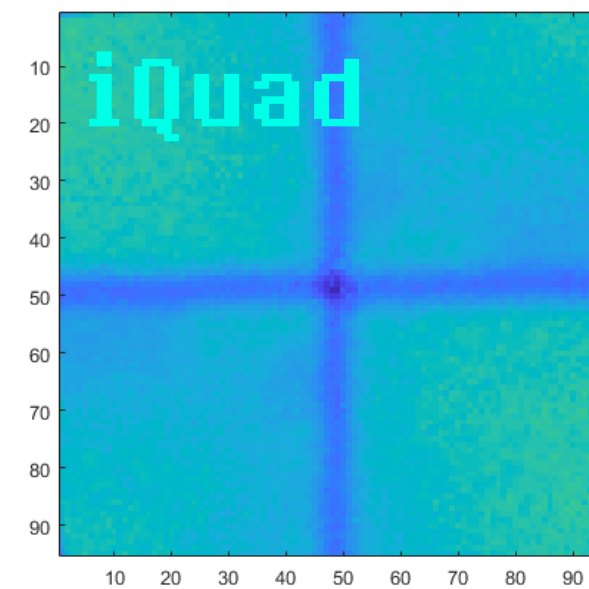

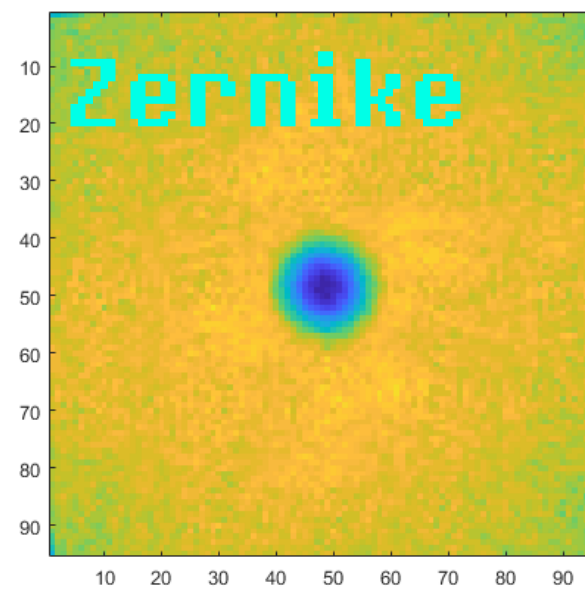

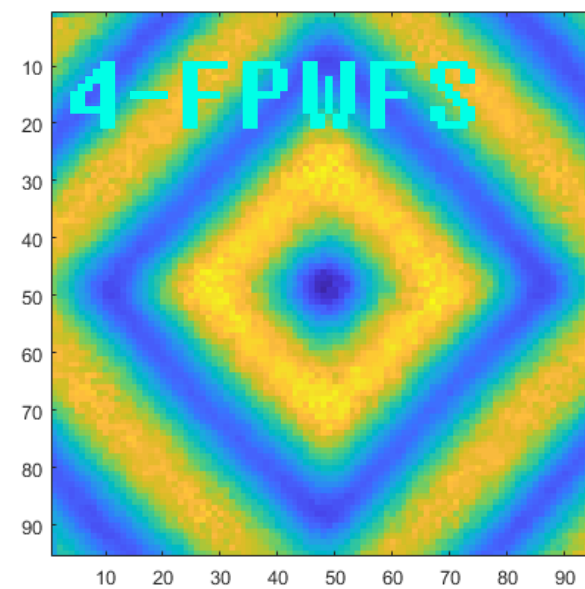

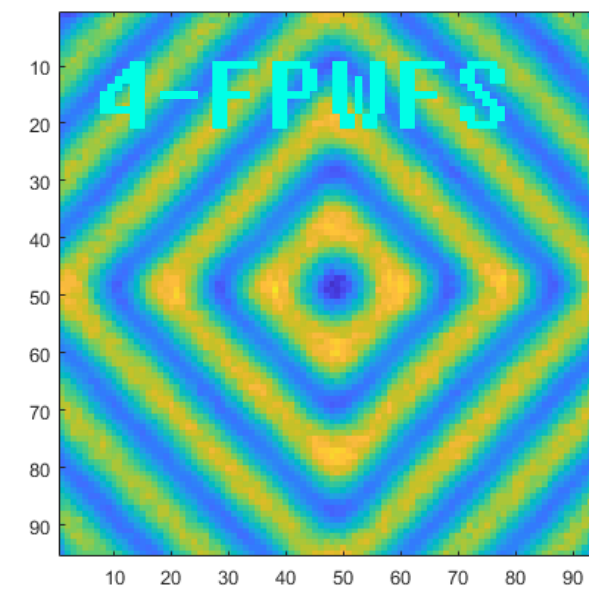

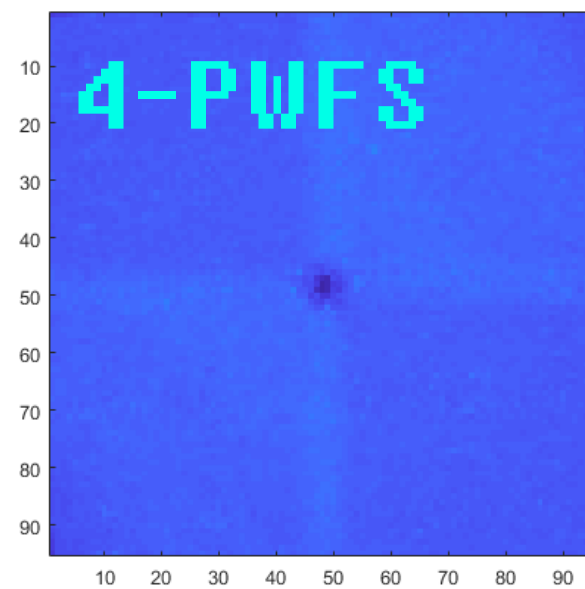

THE LOOPS EVOLUTION - SENSITIVITY MEASUREMENT

Transfer function HowTo

$$TF = \text{diag}(D^t D)^{1/2}$$

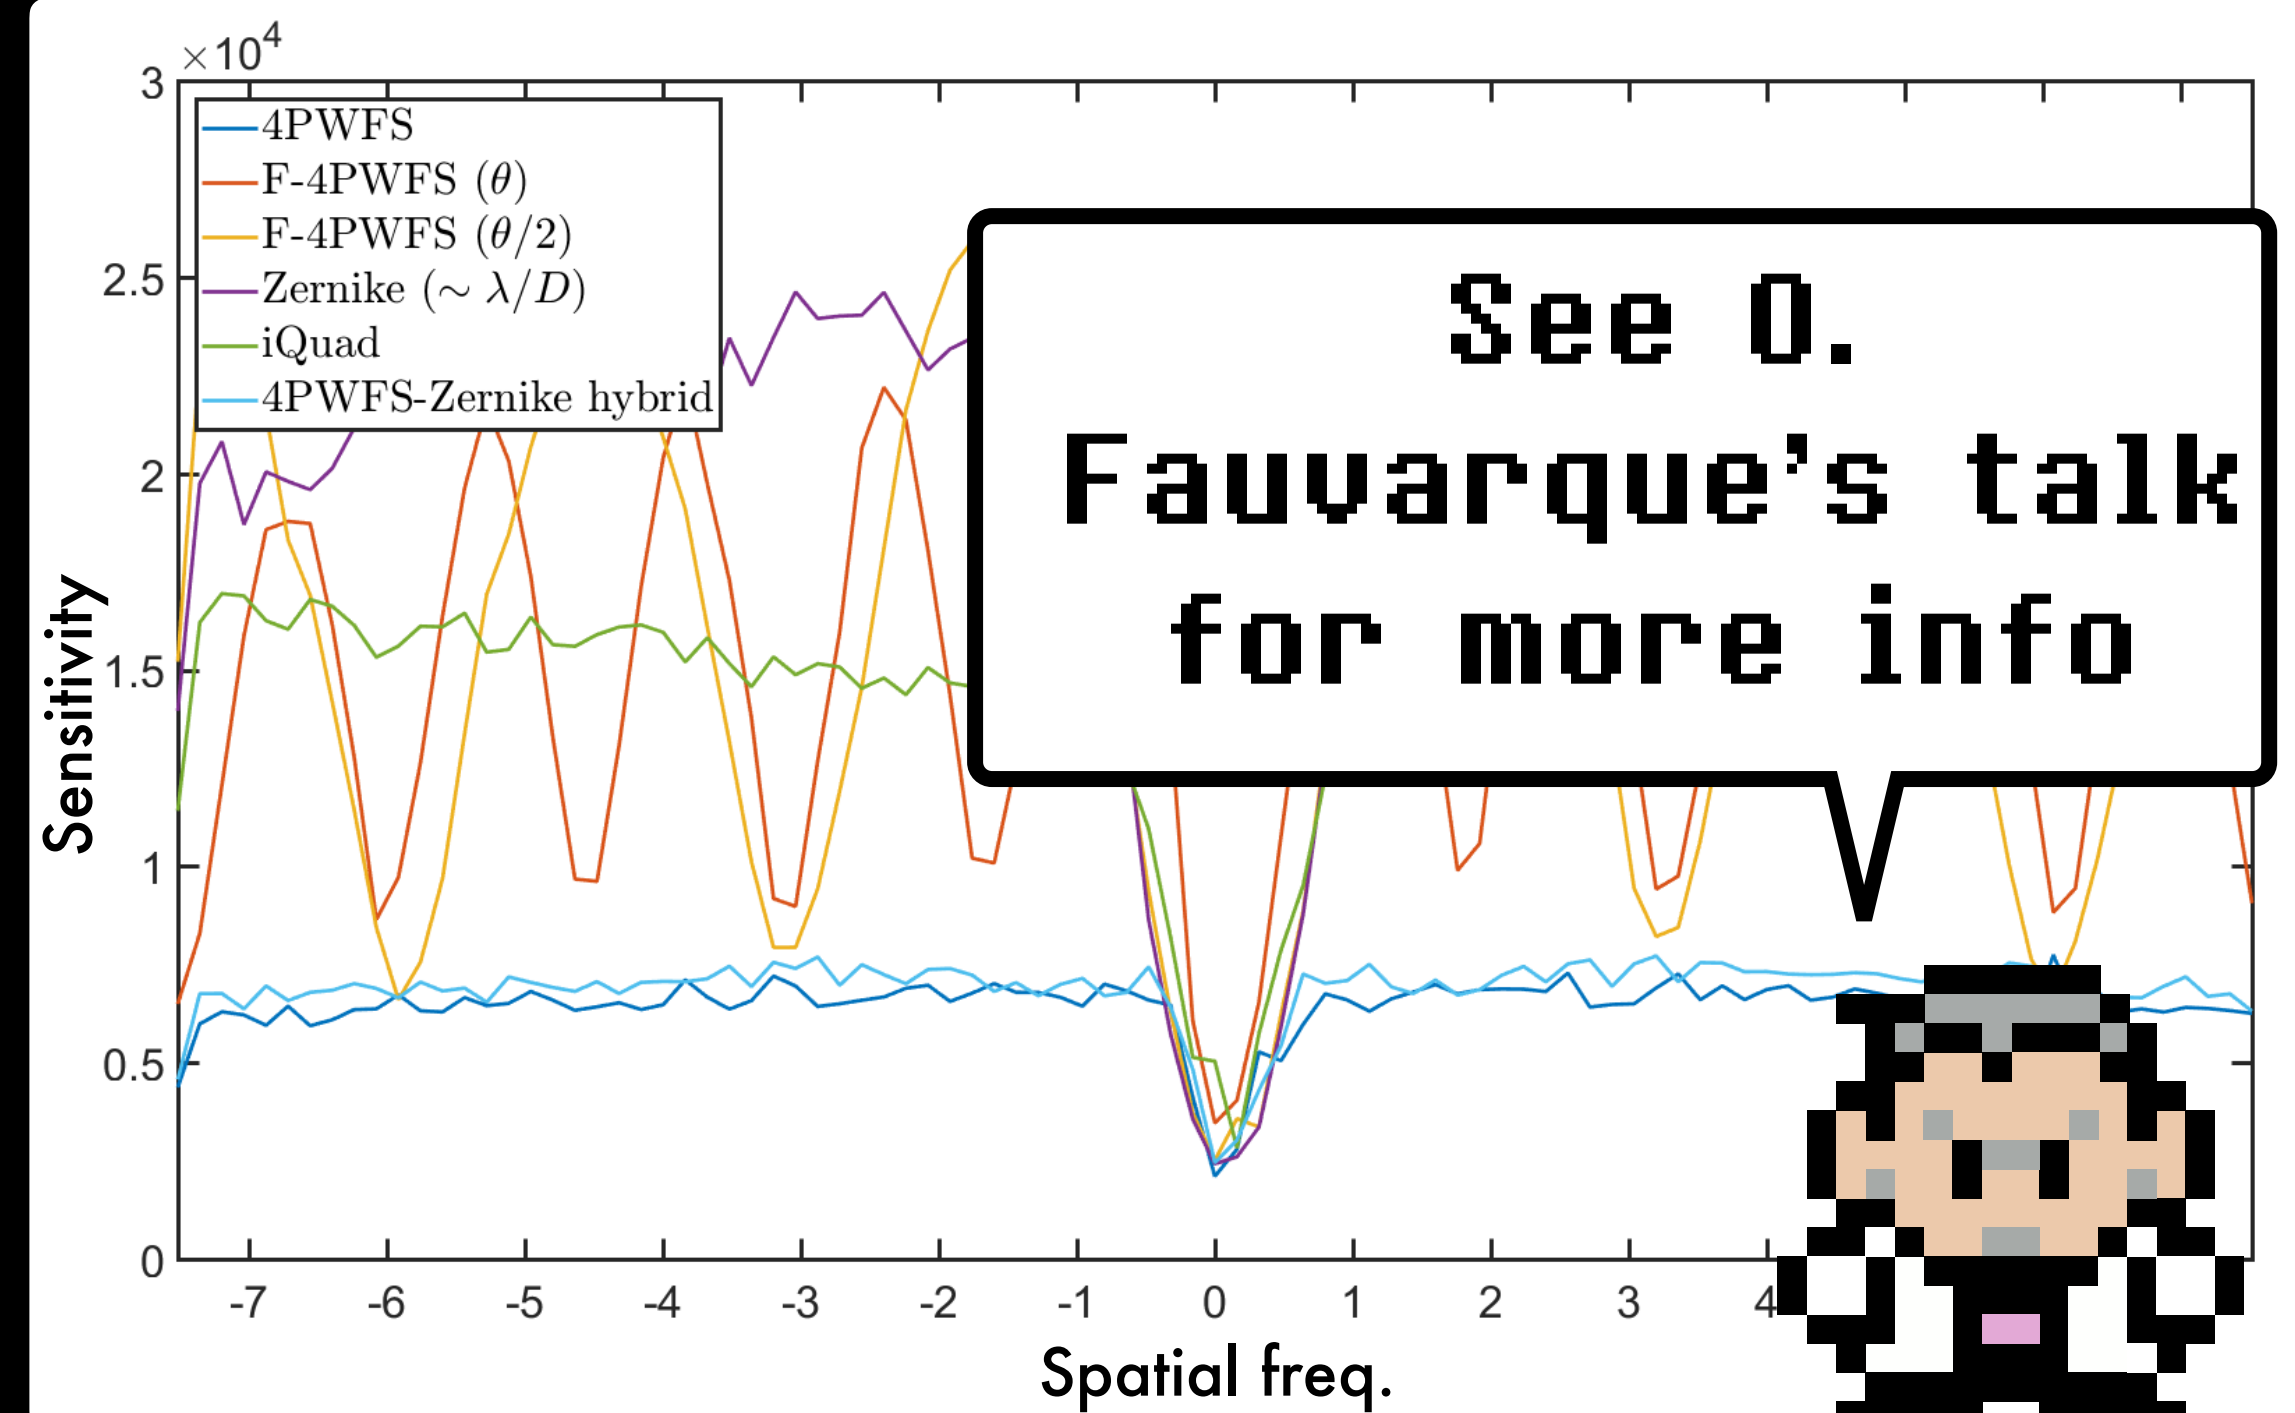

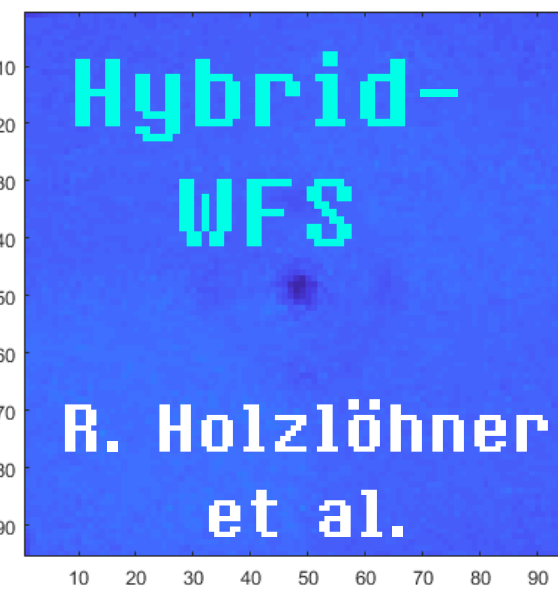

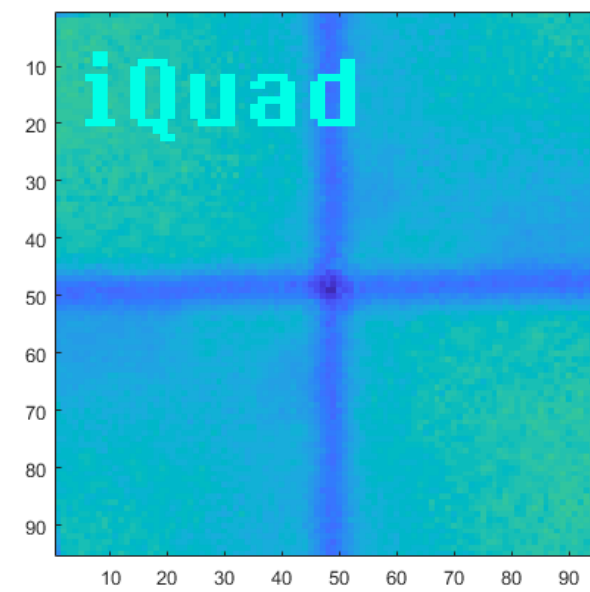

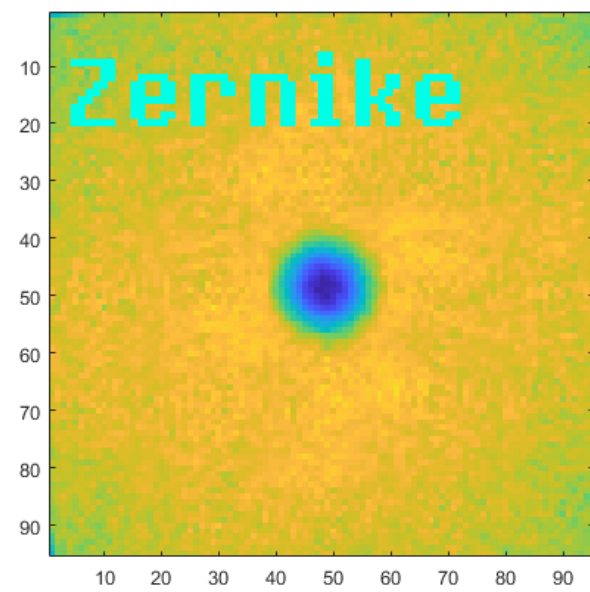

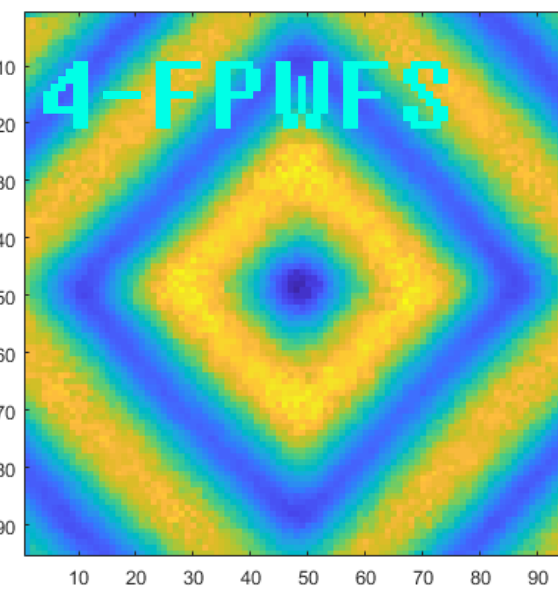

THE LOOPS EVOLUTION - SENSITIVITY MEASUREMENT

Transfer function HowTo

$$TF = \text{diag}(D^t D)^{1/2}$$

Bootstrap limits

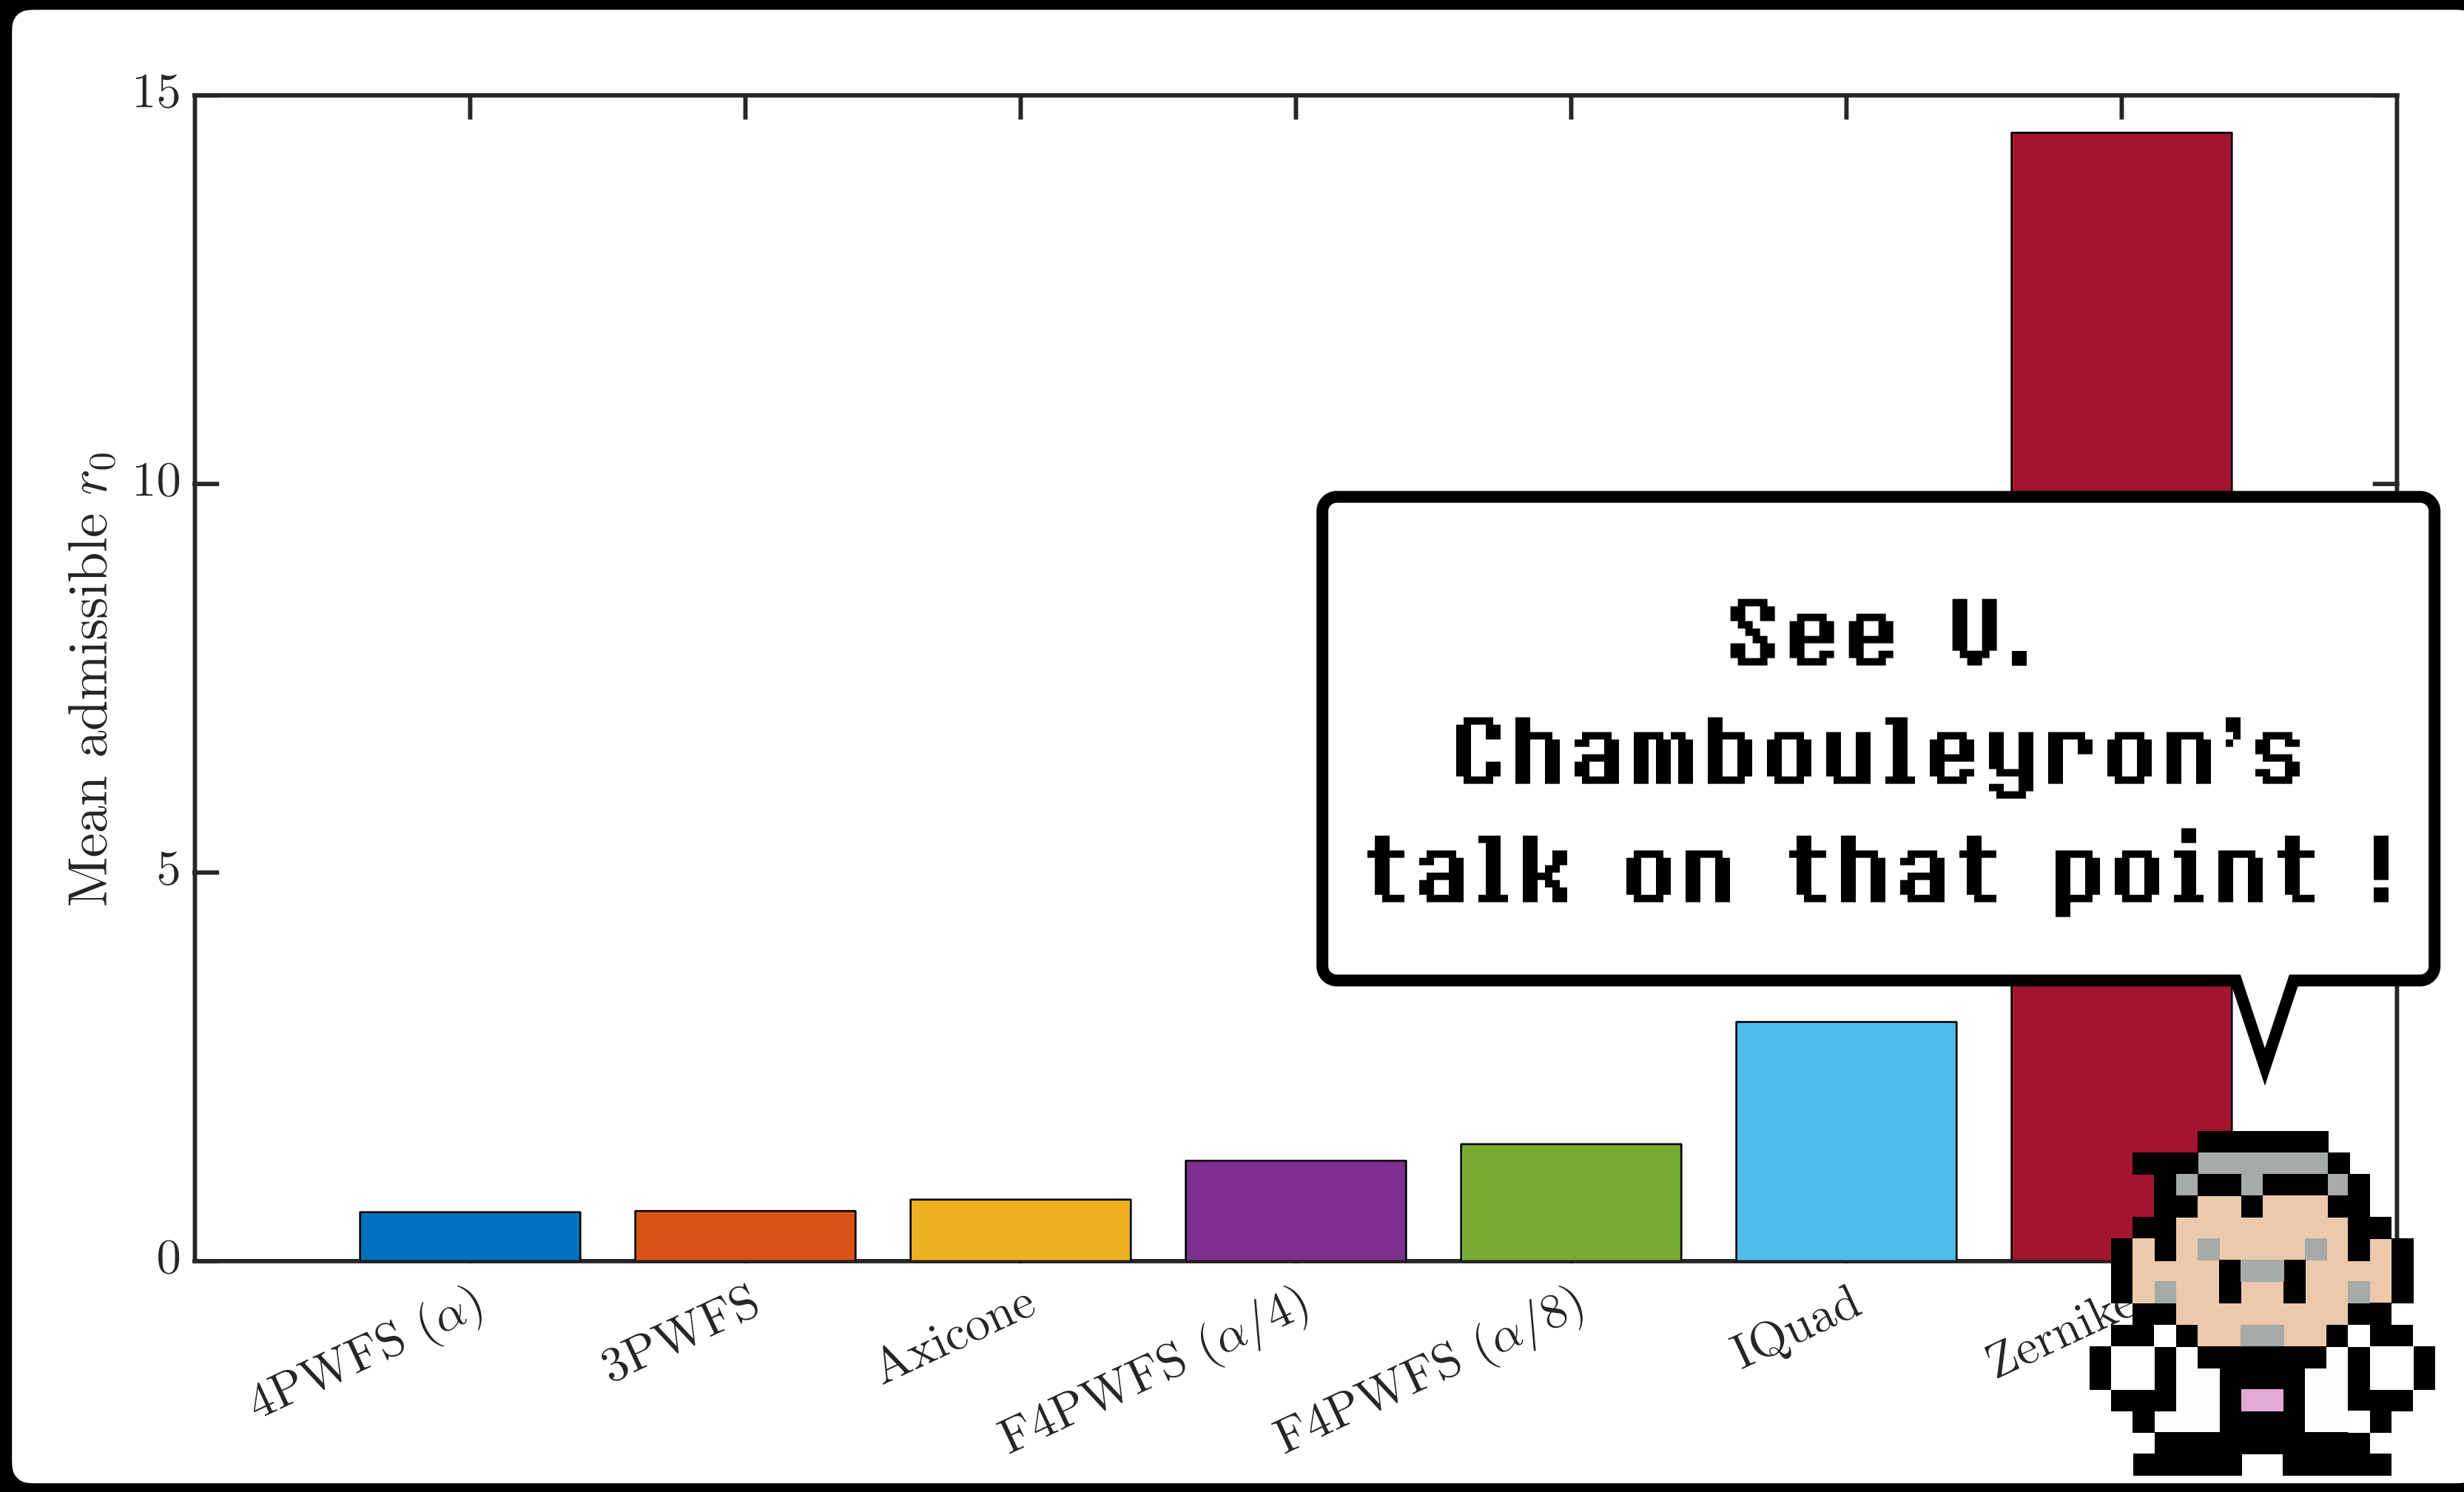

Obtained on 10 random atm. realizations

Representative of converging limits

Still a valid test to assess dynamic if OG are applied ?

Bootstrap limits

Obtained on 10 random atm. realizations

Representative of converging limits

Still a valid test to assess dynamic if OG are applied ?

See U. Chambouleyron's talk on that point !

THE LOOPS EVOLUTION - DYNAMIC ESTIMATION

Push-pull calibration with increasing amplitude

$$D \propto \text{diag}[I_{\text{calib}}(\text{Amp}), I_{\text{lin}}]$$

↑
Mode
#

→
Amplitude

THE LOOPS EVOLUTION

And some other
quests...

THE LOOPS EVOLUTION - THE FLATTENED PYRAMID

Closed-loop with the flattened pyramid

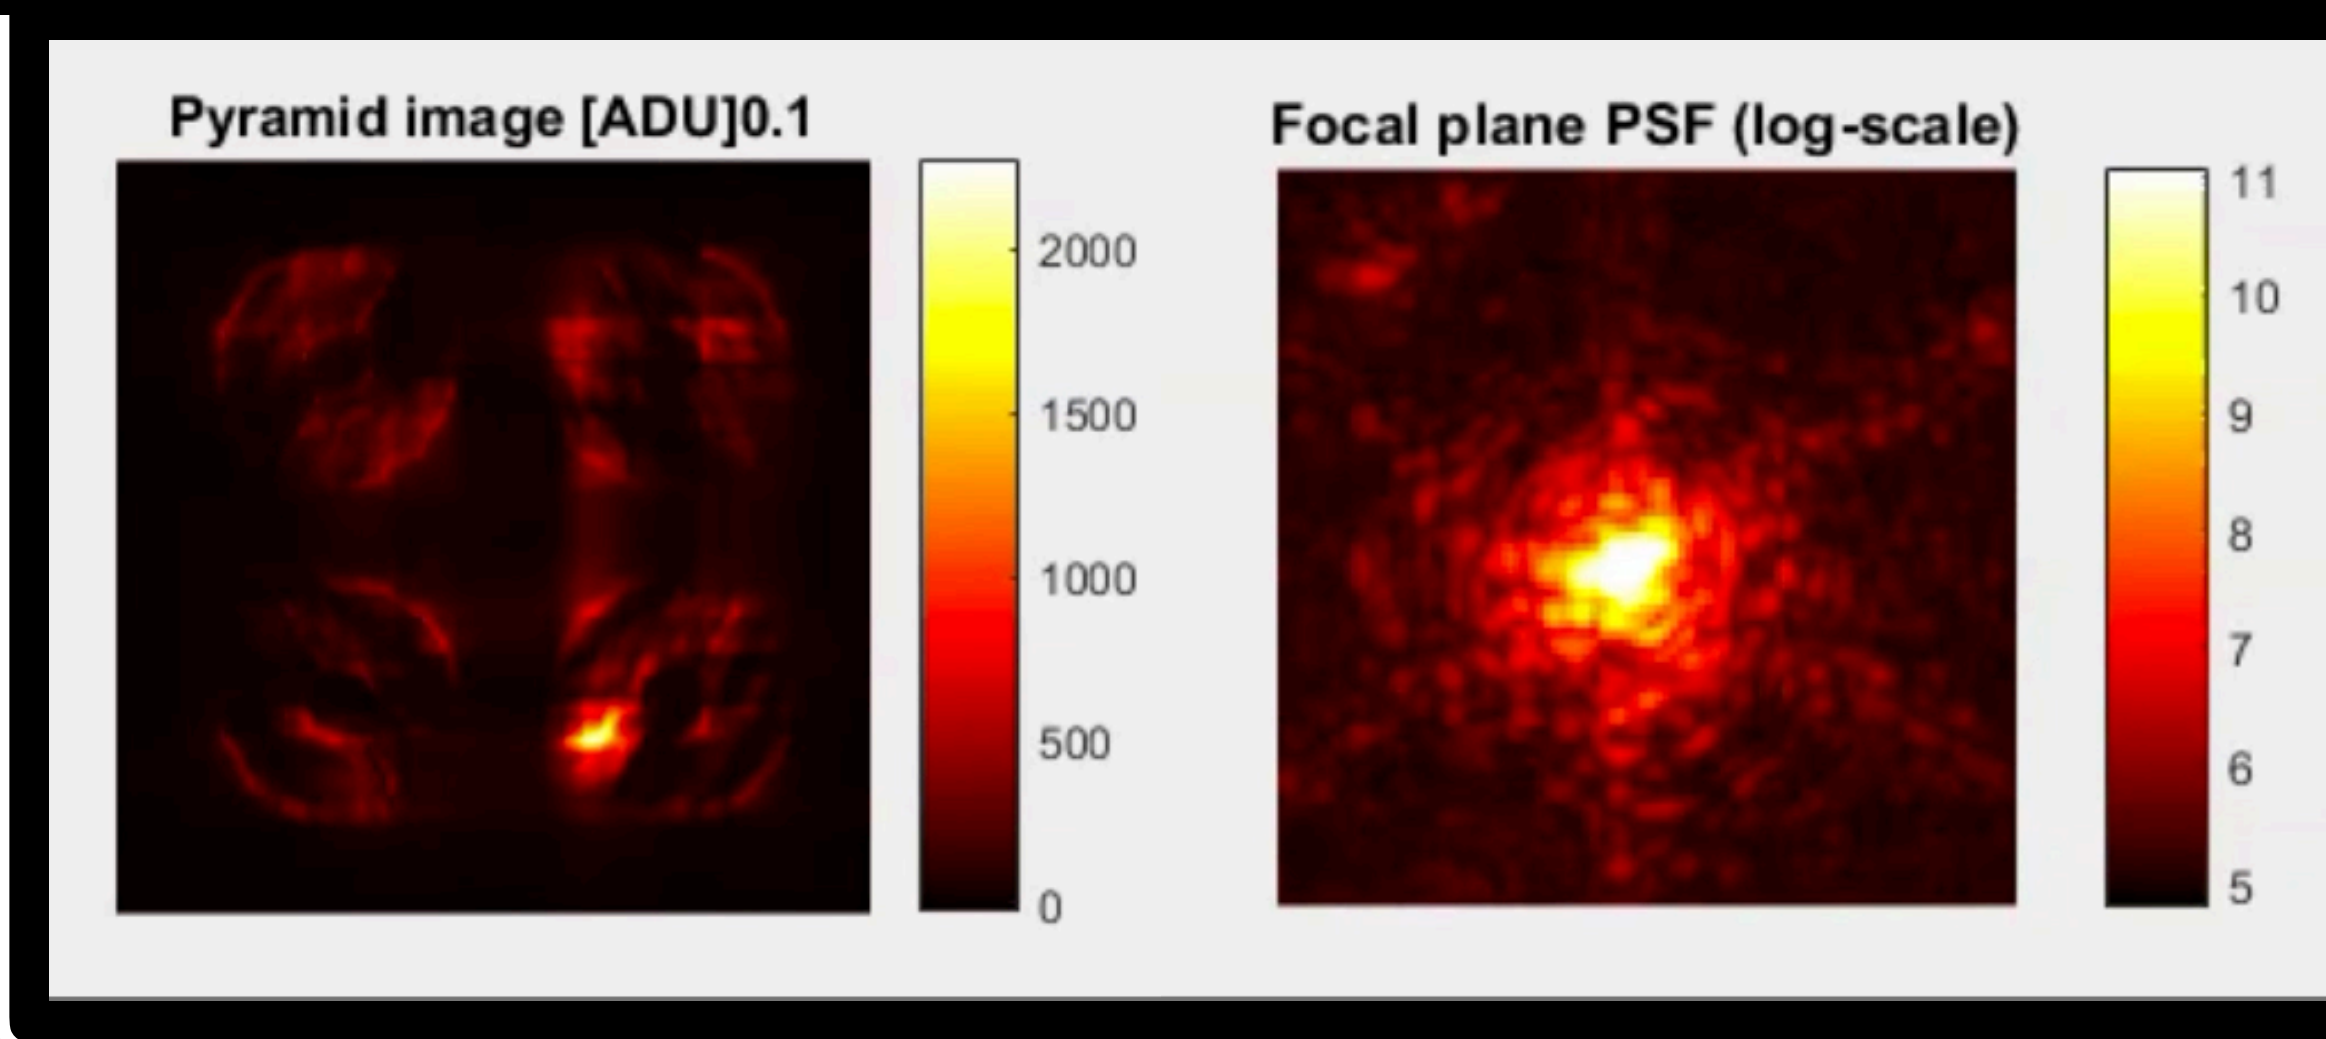

THE LOOPS EVOLUTION - AMPLITUDE MODULATION WITH SLM

Amplitude with crossed polarizers and SLM

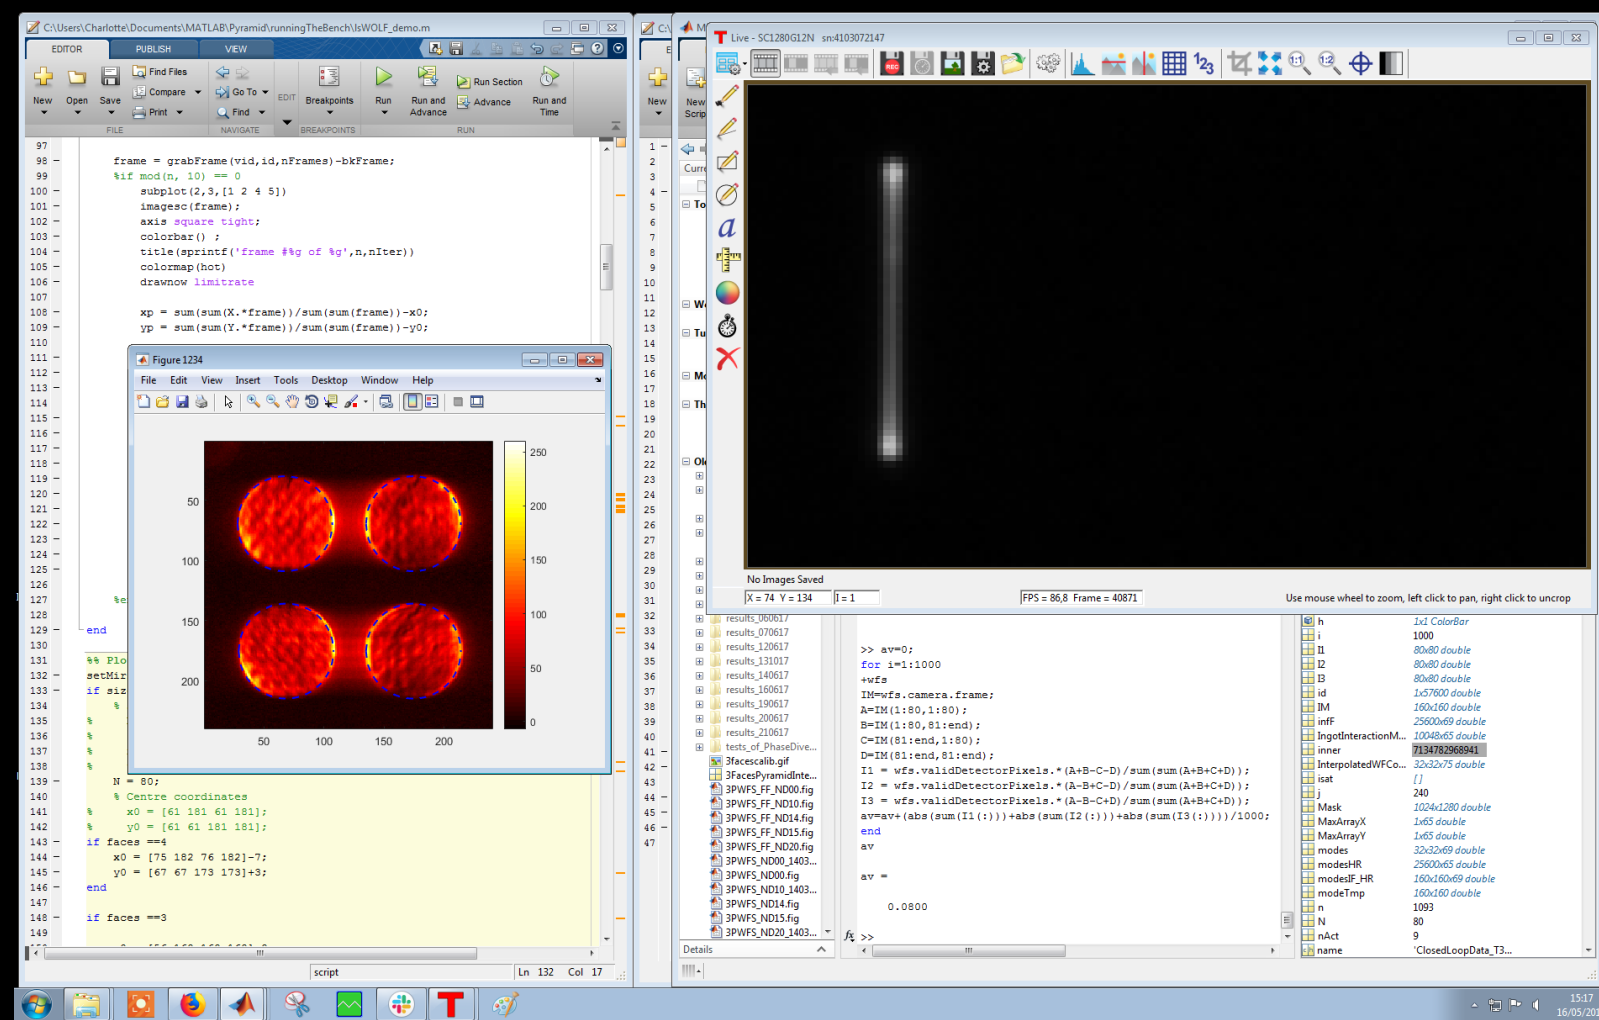

Toward complex
obscuration
masks and some
island effect !

Closed-loop

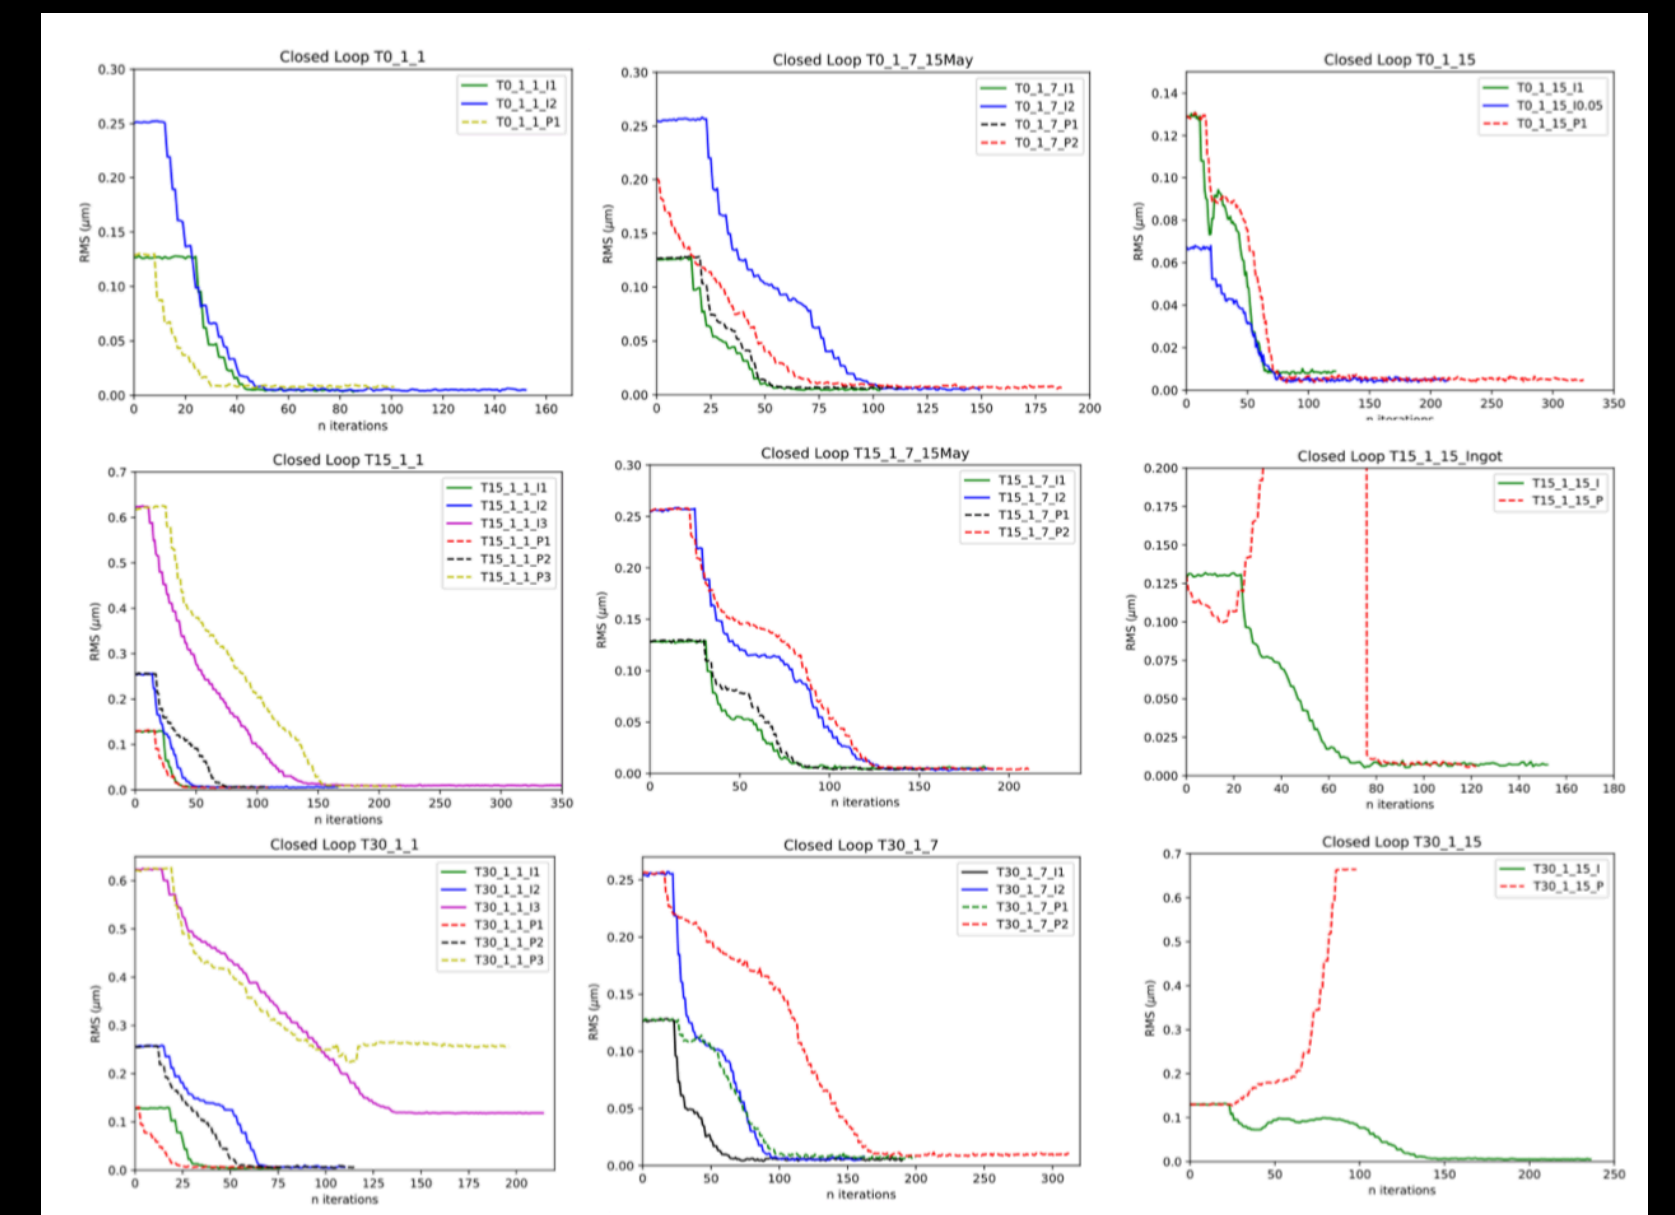

THE LOOPS EVOLUTION - INGOT ON LOOPS

Bench setup for INGOT

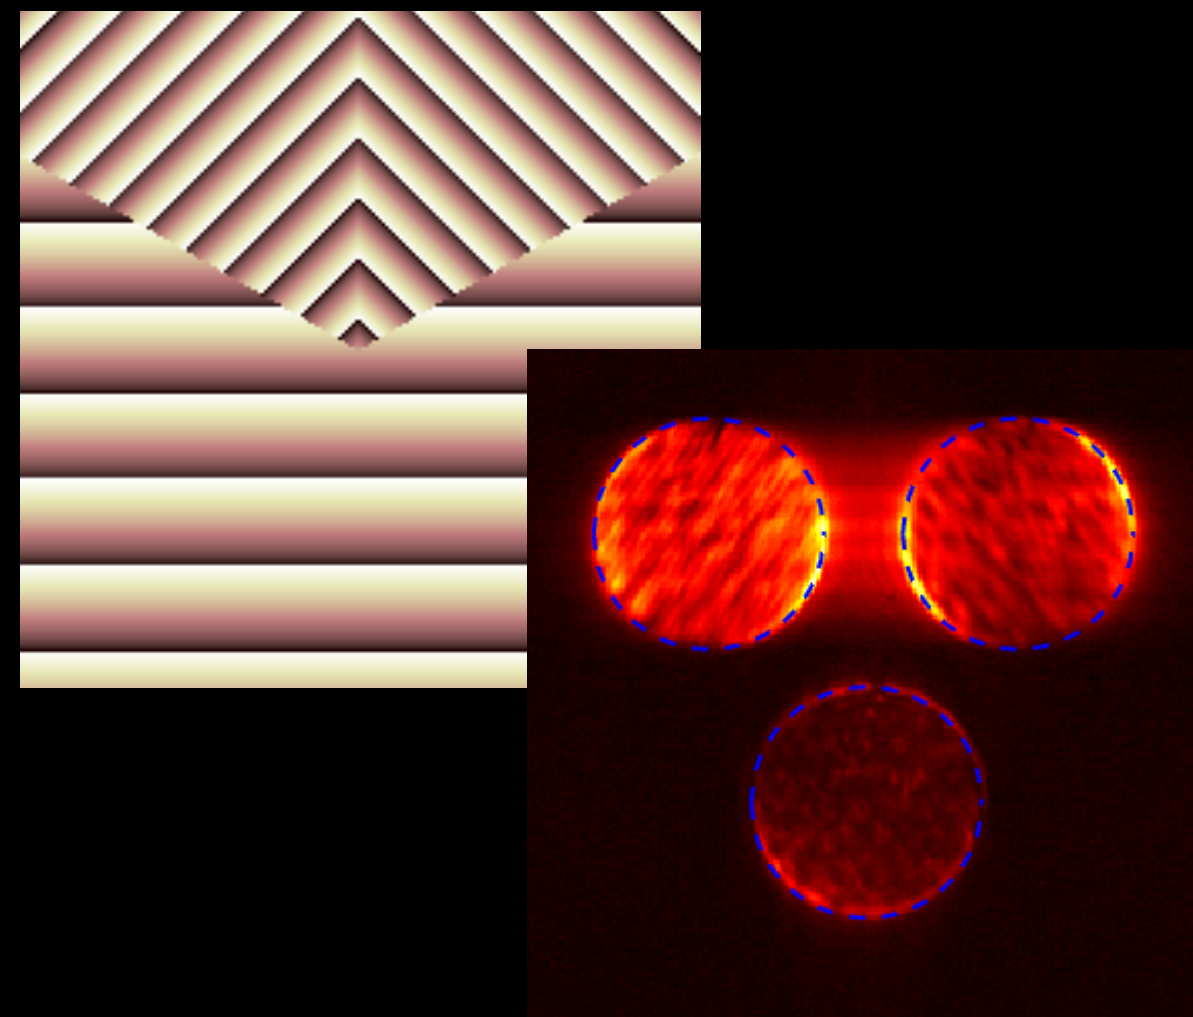

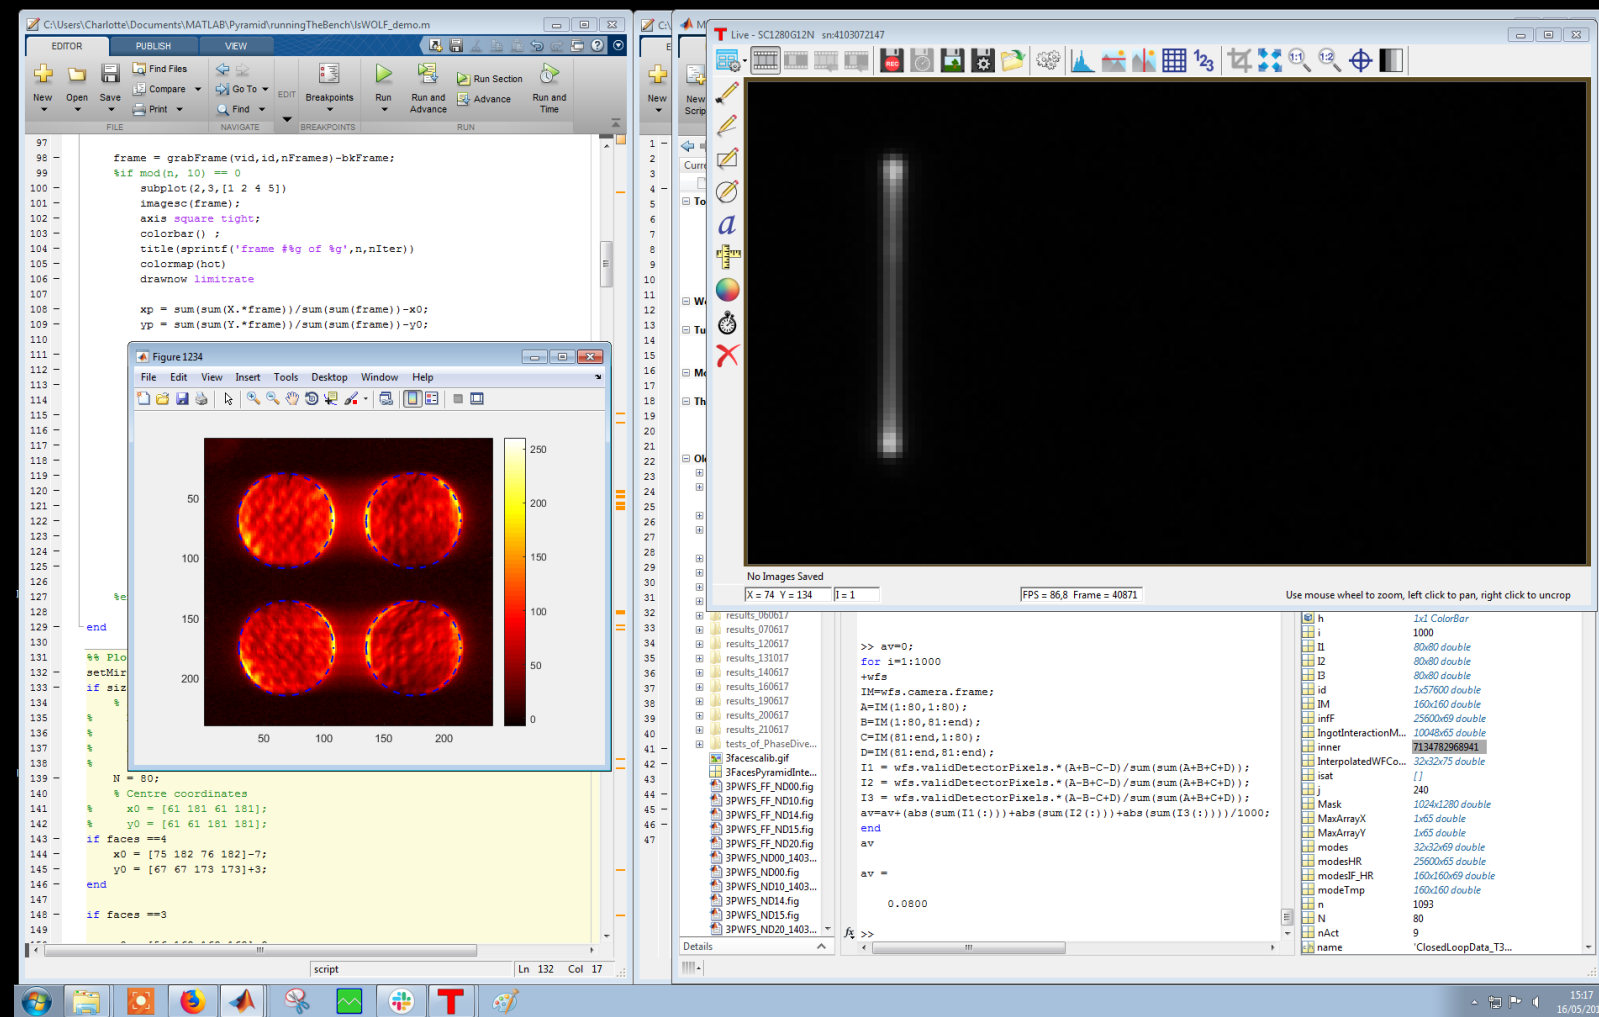

Closed-loop on DM generated turbulence

THE LOOPS EVOLUTION - INGOT ON LOOPS

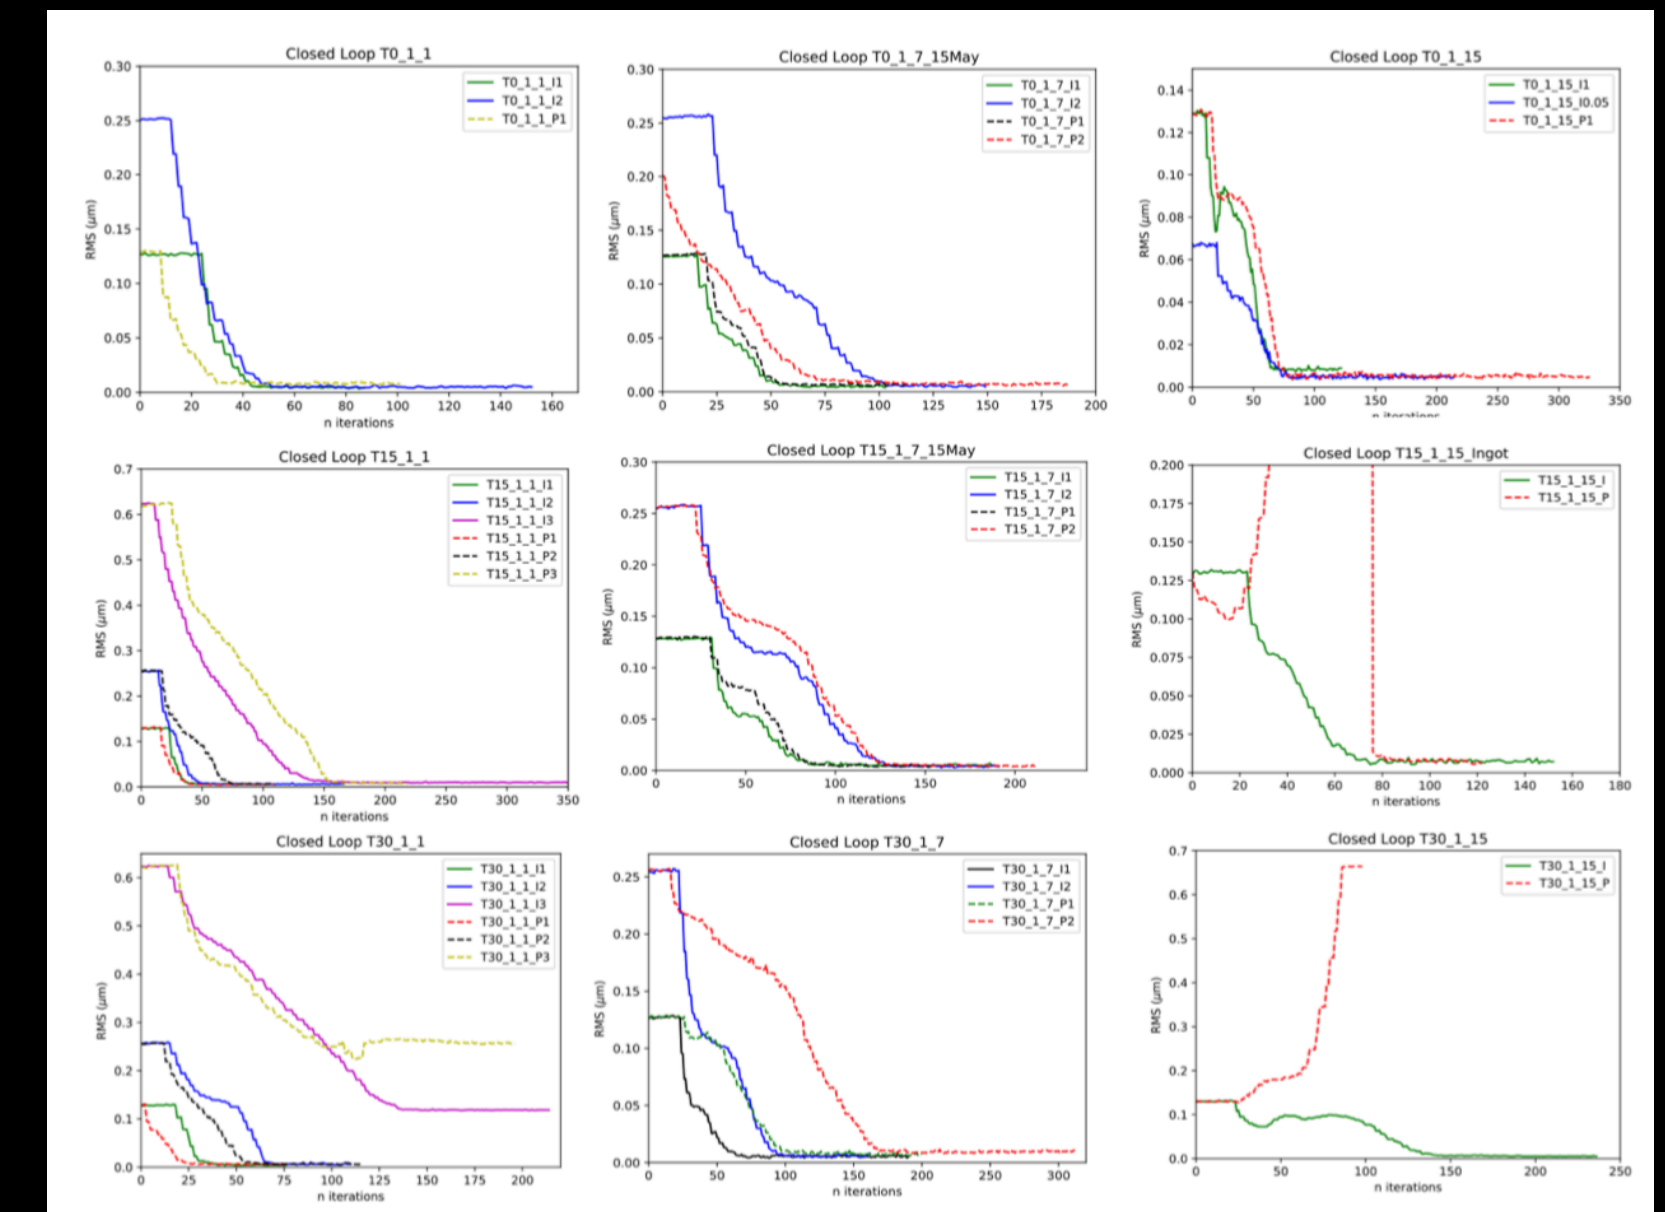

Bench setup for INGOT

Closed-loop on DM generated turbulence

Hear more from S. Di Filippo's talk on INGOT !

CIAO !

Thank you all !
And don't hesitate to
see with the team to
test your projects on
LOOPS !
